PROFESSIONAL SUMMARY

Senior Software Engineer with 6+ years of experience designing and building enterprise solutions on Microsoft 365, SharePoint Online, and the Power Platform. Delivered 9+ SPFx solutions in production impacting 10,000+ users across Fortune 500 clients. Specialized in SharePoint Framework (SPFx) development with React and TypeScript, Power Automate workflow automation, and Power Apps. Active in AI-assisted development with Claude Code and the Model Context Protocol (MCP). Proven track record building scalable internal portals, list-driven UI components, and Microsoft Graph integrations, with strong focus on governance, permissions-aware design, and CI/CD quality practices.

TECHNICAL SKILLS

Microsoft 365 & SharePoint: SharePoint Online, SharePoint Framework (SPFx), Microsoft Graph API, SharePoint REST API, PnP JS, Microsoft Teams development

Power Platform: Power Automate (cloud flows, scheduled flows, approval flows), Power Apps (Canvas and Model-driven), Dataverse, Power Fx

Frontend: React, TypeScript, JavaScript (ES6+), HTML5, CSS3, jQuery, Bootstrap, Fluent UI, Micro Frontends, Storybook, responsive design

Backend & Integrations: Node.js, Express.js, REST APIs, OAuth 2.0, JSON, OData, Alphavantage API and third-party API integrations

AI Development Tools: Claude Code, Kiro (AWS AI-powered IDE), Model Context Protocol (MCP), Anthropic Claude API, AI agent design and prompt engineering for development workflows

DevOps & Tools: Azure DevOps, PowerShell, Git, GitLab, Node.js, npm, Gulp, Percy, Visual Studio Code, Agile, CI/CD, code review, technical documentation

Languages: Spanish (Native), English (B2 - Professional working proficiency)

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Omnicom Global Solutions | Bogota, Colombia | *07/2025 - Present*

Client: Southwest Airlines | *05/2026 - 10/2026*

Stack: React, TypeScript, JavaScript, Micro Frontends, Jest, Percy, Storybook, GitLab, Jira, Yarn

Worked on the frontend of a flight booking platform for a major US airline, built on a micro frontends architecture across multiple repositories. Delivered features from ticket to production using React, TypeScript and AI-assisted development with Kiro and Claude Code.

- Built frontend features for a flight booking platform on a micro frontends architecture, working across multiple interconnected repositories.
- Integrated third-party UI components into the booking confirmation flow, including responsive placements across all breakpoints and a tabbed layout, in coordination with Product, UX and QA.
- Fixed a QA-reported defect so optional add-on pricing is displayed only after a successful booking, improving the accuracy of the confirmation page.
- Coordinated and published releases of a shared internal component library through automated semantic-release pipelines consumed by the booking application.

- Improved CI reliability by centralizing visual regression mocks upstream in the shared library, reducing maintenance overhead and flaky test failures.
- Applied AI-assisted workflows with Kiro (AWS AI-powered IDE) and Claude Code to analyze Jira tickets, plan implementations and accelerate delivery.
- Took part in structured Merge Request reviews on GitLab, presented the end-to-end booking flow in a client sprint review, and built a Power Automate flow that routes GitLab MR notifications to Teams for the whole team.

Client: AT&T | *07/2025 - Present*

Stack: SharePoint Online, SPFx, React, TypeScript, Power Automate, Power Apps

- Automated self-nomination workflows for 10,000+ users on AT&T's Future You program, eliminating manual intervention in the annual training cycle.
- Resolved critical SharePoint throttling bugs that previously blocked processing of 1,000+ records in batch operations, restoring full bulk-import functionality.
- Developed an SPFx learning platform with React and TypeScript enabling personalized learning paths, career growth tracking, and talent retention tools.
- Built Power Apps and Power Automate solutions for self-nomination workflows covering open enrollment, supervisor review, and HRBP approval stages.
- Architected automated email notifications, supervisor reminders, delegate routing, and chain-of-command lookups using Power Automate cloud flows.
- Authored technical handoff documentation including user flow diagrams and process documentation, ensuring smooth knowledge transfer between development cycles.
- Collaborated cross-functionally with team leads and stakeholders in English and Spanish, producing professional written communications and technical specifications.

SharePoint Developer

Global Hitss | Bogota, Colombia | *12/2021 - 07/2025*

Stack: SharePoint Online, SPFx, React, TypeScript, JavaScript, Power Automate

- Delivered 9 SPFx solutions in production for enterprise clients across multiple industries.
- Led end-to-end development of SharePoint portals, automated workflows, and data management tools, from requirements gathering to deployment.
- Executed full component architecture and development lifecycle using the SharePoint Framework (SPFx) with React and TypeScript.
- Created end-user documentation and conducted comprehensive testing to ensure quality and adoption of delivered solutions.
- Worked under enterprise CI/CD and quality practices, contributing to permissions-aware design and metadata governance standards.

SharePoint Developer (Freelance)

SIIMPL | Remote | *02/2025*

Client: P10 Holdings

- Built the main intranet portal for P10 Holdings with real-time stock ticker integration via the Alphavantage API.
- Implemented SharePoint-based content management leveraging native lists and libraries for scalable information architecture.

SharePoint Developer (Independent)

Freelance | Remote | *10/2021 - 12/2022*

- Delivered 3+ end-to-end SharePoint and Power Platform projects autonomously, managing the full lifecycle from requirements to deployment.

- Built a SharePoint-based financial operations system with JavaScript/CSS/HTML web components and Power Automate for document creation and approvals.
- Designed a secure corporate voting system using SharePoint, JavaScript, and Bootstrap, with real-time reporting and encrypted voting processes.
- Created a corporate requests and ticketing system for pricing offers and product management, integrated with Power Automate approvals and Excel exports.

Web Developer
C3M | Bogota, Colombia | *06/2020 - 09/2021*

- Developed web solutions and digital tools as part of an in-house product team using JavaScript, HTML5, and CSS3.
- Administered SharePoint Online environments, including configuration of sites and lists, plus creation of Master Pages and custom layouts.

EDUCATION

Mechanical Engineering
Universidad Escuela Colombiana de Carreras Industriales (UECCI) | *2019*

Industrial Mechanical Technology
Universidad Escuela Colombiana de Carreras Industriales (UECCI) | *2016*

LICENSES AND CERTIFICATIONS

Claude Code in Action - Anthropic | *04/2026*
Skills: Claude Code, Model Context Protocol (MCP), AI-assisted development

Course Claude Code - Platzi | *04/2026*
Skills: Claude Code, Model Context Protocol (MCP)

Advanced Full Stack Web Development - Ministerio de Tecnologias de la Informacion y las Comunicaciones (MinTIC) | *11/2024*
Skills: Node.js, Express.js, MongoDB, REST APIs, full stack architecture

Power Automate Course - Udemy | *03/2024*
Skills: Microsoft Power Automate, Microsoft 365 workflow automation

Scrum Foundation Professional Certificate (SFPC)

Additional Training: JavaScript ECMAScript 6, Advanced JavaScript Best Practices, Introduction to TypeScript, Complete Web Development with HTML5/CSS3/JavaScript

LANGUAGES

English: B2 - Upper-Intermediate (Professional working proficiency, in active study)

Spanish: Native
